DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE	
<p>This is a twenty-one story high apartment building with concrete foundation walls and running bond brick building walls. Fenestration is symmetrical throughout the the building facades. Flat windows of the same typr are arranged in columns. Equidistant continuous horizontal, concrete, band courses visually circumscribe each story facade and balance the vertical progression of the columns of windows. There are two types of windows, all with brick sills and flat, concrete lintels, which are double hung with 1/1 lights and single hung with 3/3 lights. Concrete window baskets decorate some of the double hung windows. Flat plate glass door surmount a concrete stoop and provide the main entrance in the center of the St. Paul St. facade.</p> <p>A plain view would show the building in the shape of the letter "H" with the horizontal element of that letter parallel to St. Paul St. The facade facing St. Paul St., as well as its identical counterpoint facing Calvert St., is thirteen bays wide with the two types of windows basically alternating. The two other facades are eights bays wide with the three over three light windows forming the two center columns of windows.</p>
